Journal of PHOTOCHEMISTRY AND PHOTOBIOLOGY B: BIOLOGY

Subject Index of Volume 41

Absorption profiles at the plasma membrane
orientation of the phycomyces blue light receptor – testing the single dipole hypothesis, 152
Action of drugs on photoaffinity labelling
selective photoaffinity labelling of one mitochondrial protein in living cells of *Saccharomyces cerevisiae* with the fluorescent probe APMC. Identification of the target protein as subunit I of cytochrome c oxidase, 90
Aggregation
polymer bound pyrrole compounds, IX. Photophysical and singlet molecular oxygen photosensitizing properties of mesoporphyrin IX covalently bound to a low molecular weight polyethylene glycol, 53
5-Aminolaevulinic acid
a hydroxypyridinone (CP94) enhances protoporphyrin IX formation in 5-aminolaevulinic acid treated cells, 136
δ-Aminolevulinic acid
delta-aminolevulinic acid-induced fluorescence in normal human lymphocytes, 22
primary clinical response and long-term follow-up of solar keratoses treated with topically applied 5-aminolevulinic acid and irradiation by different wave bands of light, 145
Amphiphilic
polymer bound pyrrole compounds, IX. Photophysical and singlet molecular oxygen photosensitizing properties of mesoporphyrin IX covalently bound to a low molecular weight polyethylene glycol, 53
Angiosperm
protochlorphyllide reduction and greening in angiosperms: an evolutionary perspective, 201
Anterior cataracts
aqueous humour and crystalline lens changes associated with ultraviolet radiation or mechanical damage to corneal epithelium in freshwater rainbow trout eyes, 165
Anti-oxidant
the carotenoids as anti-oxidants – a review, 189
Antioxidant efficiency
study on the antioxidant activity of cholesteryl esters of some phenolic acids by chemiluminescence, 109
Antioxidants
the use of endogenous antioxidants to improve photoprotection, 1
Apoptosis
different DNA repair time courses in human lymphoid cells after UVA, UVA_1, UVB and PUVA in vitro, 103

Basal cell carcinoma
UV induced erythema evaluated 24 h post-exposure by skin reflectance and laser Doppler flowmetry is identical in healthy persons and patients with cutaneous malignant melanoma and basal cell cancer, 30
Binding parameters
studies on the interaction of hematoporphyrin with hemoglobin, 67

Blue light photoreceptor
orientation of the phycomyces blue light receptor – testing the single dipole hypothesis, 152

Carotenoids
the carotenoids as anti-oxidants – a review, 189
Catalase
the use of endogenous antioxidants to improve photoprotection, 1
Cationic phthalocyanine
synthesis and photophysical properties of a new cationic water-soluble Zn phthalocyanine, 227
Cell survival
a hydroxypyridinone (CP94) enhances protoporphyrin IX formation in 5-aminolaevulinic acid treated cells, 136
Chemiluminescence
study on the antioxidant activity of cholesteryl esters of some phenolic acids by chemiluminescence, 109
Chlorophyllide
room temperature fluorescence spectra of protochlorophyllide and chlorophyllide forms in etiolated bean leaves, 73
Chlorophyll synthesis
protochlorphyllide reduction and greening in angiosperms: an evolutionary perspective, 201
Cholesteryl esters of hydroxy cinnamic acids
study on the antioxidant activity of cholesteryl esters of some phenolic acids by chemiluminescence, 109
Circular dichroism
photocleavage of plasmid DNA by the prophyrin *meso*-tetrakis[4-(carboxymethyleneoxy)phenyl]porphyrin, 128
Corneal damage
aqueous humour and crystalline lens changes associated with ultraviolet radiation or mechanical damage to corneal epithelium in freshwater rainbow trout eyes, 165
Cyprinids
effect of UV-B radiation on goblet cells in the skin of different fish species, 222
Cytochrome c reduction
light induced redox reactions involving mammalian ferritin as photocatalyst, 83

Dark
protochlorphyllide reduction and greening in angiosperms: an evolutionary perspective, 201
Delayed luminescence
melanin–porphyrin interaction monitored by delayed luminescence and photoacoustics, 45
Dichroic chromophore
orientation of the phycomyces blue light receptor – testing the single dipole hypothesis, 152
1,2-Diethyl-3-hydroxypyridin-4-one
a hydroxypyridinone (CP94) enhances protoporphyrin IX formation in 5-aminolaevulinic acid treated cells, 136

1,6-Dioxapyrene plus UVA
enzymatic recognition and biological effects of photodynamic damage induced in DNA by 1,6-dioxapyrene plus UVA, 60
DNA damage
analysis of the mutations induced in the *E. coli lac Z* gene by a psoralen analog, 36
DNA repair
enzymatic recognition and biological effects of photodynamic damage induced in DNA by 1,6-dioxapyrene plus UVA, 60
different DNA repair time courses in human lymphoid cells after UVA, UVA_1, UVB and PUVA in vitro, 103
the effect of the OmpT protease on excision repair in UV-irradiated *Escherichia coli*, 245

E. coli
the effect of the OmpT protease on excision repair in UV-irradiated *Escherichia coli*, 245
Endogenous-antioxidants
the use of endogenous antioxidants to improve photoprotection, 1
Endometrium
effect of continuous and multiple doses of 5-aminolevulinic acid on protoporphyrin IX concentrations in the rat uterus, 122
Energy transfer
photocleavage of plasmid DNA by the prophyrin *meso*-tetrakis[4-(carboxymethyleneoxy)phenyl]porphyrin, 128
Epicutaneous application
primary clinical response and long-term follow-up of solar keratoses treated with topically applied 5-aminolevulinic acid and irradiation by different wave bands of light, 145
Evolution
protochlorphyllide reduction and greening in angiosperms: an evolutionary perspective, 201

Fluorescence
melanin–porphyrin interaction monitored by delayed luminescence and photoacoustics, 45
polymer bound pyrrole compounds, IX. Photophysical and singlet molecular oxygen photosensitizing properties of mesoporphyrin IX covalently bound to a low molecular weight polyethylene glycol, 53
photocleavage of plasmid DNA by the prophyrin *meso*-tetrakis[4-(carboxymethyleneoxy)phenyl]porphyrin, 128
Fluorescence lifetime
temporally-separated ultrafast-emission dynamics of neutral and cationic molecules in guanine and its derivative aqueous solutions, 114
Fluorescence quantum yield
temporally-separated ultrafast-emission dynamics of neutral and cationic molecules in guanine and its derivative aqueous solutions, 114
Fluorescence spectroscopy
room temperature fluorescence spectra of protochlorophyllide and chlorophyllide forms in etiolated bean leaves, 73
Follow-up
primary clinical response and long-term follow-up of solar keratoses treated with topically applied 5-aminolevulinic acid and irradiation by different wave bands of light, 145
Fractional centrifugation and precipitation
selective photoaffinity labelling of one mitochondrial protein in living cells of *Saccharomyces cerevisiae* with the fluorescent probe APMC. Identification of the target protein as subunit I of cytochrome c oxidase, 90

Gaussian resolution
room temperature fluorescence spectra of protochlorophyllide and chlorophyllide forms in etiolated bean leaves, 73
Glucose oxidase
a photo-activated, protein-based, NO/H_2O_2 generating system with tumoricidal activity composed of the nitric oxide derivative of apo-metallothionein (thionein-NO) and glucose oxidase, 249
Glycolysis
post-exposure processes in Temoporfin-photosensitized cells in vitro: reliance on energy metabolism, 173
Goblet cells
effect of UV-B radiation on goblet cells in the skin of different fish species, 222
Greening
room temperature fluorescence spectra of protochlorophyllide and chlorophyllide forms in etiolated bean leaves, 73
Guanine
temporally-separated ultrafast-emission dynamics of neutral and cationic molecules in guanine and its derivative aqueous solutions, 114
Guanosine
temporally-separated ultrafast-emission dynamics of neutral and cationic molecules in guanine and its derivative aqueous solutions, 114
Guanosine 5′-monophosphate
temporally-separated ultrafast-emission dynamics of neutral and cationic molecules in guanine and its derivative aqueous solutions, 114

Hematoporphyrin
studies on the interaction of hematoporphyrin with hemoglobin, 67
Hemoglobin
studies on the interaction of hematoporphyrin with hemoglobin, 67
Hydrogen peroxide
a photo-activated, protein-based, NO/H_2O_2 generating system with tumoricidal activity composed of the nitric oxide derivative of apo-metallothionein (thionein-NO) and glucose oxidase, 249

Inhibition rate constants
study on the antioxidant activity of cholesteryl esters of some phenolic acids by chemiluminescence, 109
Intracellular ATP
post-exposure processes in Temoporfin-photosensitized cells in vitro: reliance on energy metabolism, 173
Iron chelators
a hydroxypyridinone (CP94) enhances protoporphyrin IX formation in 5-aminolaevulinic acid treated cells, 136

Lac Z gene
analysis of the mutations induced in the *E. coli lac Z* gene by a psoralen analog, 36
Laser Doppler flowmetry
UV induced erythema evaluated 24 h post-exposure by skin reflectance and laser Doppler flowmetry is identical in healthy persons and patients with cutaneous malignant melanoma and basal cell cancer, 30
Light
protochlorphyllide reduction and greening in angiosperms: an evolutionary perspective, 201
Light-induced redox reactions
light induced redox reactions involving mammalian ferritin as photocatalyst, 83
Lipid peroxidation
post-exposure processes in Temoporfin-photosensitized cells in vitro: reliance on energy metabolism, 173
Lonidamine
study of the photochemical and phototoxic properties of lonidamine [1-(2,4-dichlorobenzyl)-1H-indazol-3-carboxylic acid], 11

Lymphocytes
delta-aminolevulinic acid-induced fluorescence in normal human lymphocytes, 22

Mammalian ferritin photocatalyst
light induced redox reactions involving mammalian ferritin as photocatalyst, 83
Mechanical damage
aqueous humour and crystalline lens changes associated with ultraviolet radiation or mechanical damage to corneal epithelium in freshwater rainbow trout eyes, 165
Melanin
melanin–porphyrin interaction monitored by delayed luminescence and photoacoustics, 45
Melanoma
UV induced erythema evaluated 24 h post-exposure by skin reflectance and laser Doppler flowmetry is identical in healthy persons and patients with cutaneous malignant melanoma and basal cell cancer, 30
Metallothionein
a photo-activated, protein-based, NO/H_2O_2 generating system with tumoricidal activity composed of the nitric oxide derivative of apo-metallothionein (thionein-NO) and glucose oxidase, 249
Microspectrofluorometer
delta-aminolevulinic acid-induced fluorescence in normal human lymphocytes, 22
Minimal erythema dose
UV induced erythema evaluated 24 h post-exposure by skin reflectance and laser Doppler flowmetry is identical in healthy persons and patients with cutaneous malignant melanoma and basal cell cancer, 30
Mitochondria
post-exposure processes in Temoporfin-photosensitized cells in vitro: reliance on energy metabolism, 173
Mitochondrial proteins
selective photoaffinity labelling of one mitochondrial protein in living cells of *Saccharomyces cerevisiae* with the fluorescent probe APMC. Identification of the target protein as subunit I of cytochrome c oxidase, 90
mTHPC
post-exposure processes in Temoporfin-photosensitized cells in vitro: reliance on energy metabolism, 173
Mucus
effect of UV-B radiation on goblet cells in the skin of different fish species, 222
Multidrug resistance
a hydroxypyridinone (CP94) enhances protoporphyrin IX formation in 5-aminolaevulinic acid treated cells, 136
Mutation
analysis of the mutations induced in the *E. coli lac Z* gene by a psoralen analog, 36

Neurotransmitters
vascular actions of 'caged' phenylephrine analogs depend on the structure and site of attachment of the 2-nitrobenzyl group, 233
Nitric oxide
a photo-activated, protein-based, NO/H_2O_2 generating system with tumoricidal activity composed of the nitric oxide derivative of apo-metallothionein (thionein-NO) and glucose oxidase, 249
o-Nitrobenzyl
vascular actions of 'caged' phenylephrine analogs depend on the structure and site of attachment of the 2-nitrobenzyl group, 233
Norepinephrine
vascular actions of 'caged' phenylephrine analogs depend on the structure and site of attachment of the 2-nitrobenzyl group, 233
Nucleoid density
different DNA repair time courses in human lymphoid cells after UVA, UVA_1, UVB and PUVA in vitro, 103
Nucleotide excision repair
enzymatic recognition and biological effects of photodynamic damage induced in DNA by 1,6-dioxapyrene plus UVA, 60

OmpT gene
the effect of the OmpT protease on excision repair in UV-irradiated *Escherichia coli*, 245

pBR322 DNA
photocleavage of plasmid DNA by the prophyrin *meso*-tetrakis[4-(carboxymethyleneoxy)phenyl]porphyrin, 128
Peroxynitrite
a photo-activated, protein-based, NO/H_2O_2 generating system with tumoricidal activity composed of the nitric oxide derivative of apo-metallothionein (thionein-NO) and glucose oxidase, 249
Photoacoustic
melanin–porphyrin interaction monitored by delayed luminescence and photoacoustics, 45
Photoaffinity labelling
selective photoaffinity labelling of one mitochondrial protein in living cells of *Saccharomyces cerevisiae* with the fluorescent probe APMC. Identification of the target protein as subunit I of cytochrome c oxidase, 90
Photocleavage
photocleavage of plasmid DNA by the prophyrin *meso*-tetrakis[4-(carboxymethyleneoxy)phenyl]porphyrin, 128
Photodynamic
polymer bound pyrrole compounds, IX. Photophysical and singlet molecular oxygen photosensitizing properties of mesoporphyrin IX covalently bound to a low molecular weight polyethylene glycol, 53
Photodynamic effects
enzymatic recognition and biological effects of photodynamic damage induced in DNA by 1,6-dioxapyrene plus UVA, 60
Photodynamic therapy
delta-aminolevulinic acid-induced fluorescence in normal human lymphocytes, 22
effect of continuous and multiple doses of 5-aminolevulinic acid on protoporphyrin IX concentrations in the rat uterus, 122
a hydroxypyridinone (CP94) enhances protoporphyrin IX formation in 5-aminolaevulinic acid treated cells, 136
primary clinical response and long-term follow-up of solar keratoses treated with topically applied 5-aminolevulinic acid and irradiation by different wave bands of light, 145
Photoprotection
the use of endogenous antioxidants to improve photoprotection, 1
Photorelease
vascular actions of 'caged' phenylephrine analogs depend on the structure and site of attachment of the 2-nitrobenzyl group, 233
Photosensitization
analysis of the mutations induced in the *E. coli lac Z* gene by a psoralen analog, 36
post-exposure processes in Temoporfin-photosensitized cells in vitro: reliance on energy metabolism, 173
Photosensitizer
studies on the interaction of hematoporphyrin with hemoglobin, 67
Phototoxicity
study of the photochemical and phototoxic properties of lonidamine [1-(2,4-dichlorobenzyl)-1H-indazol-3-carboxylic acid], 11
Phototropism
orientation of the phycomyces blue light receptor – testing the single dipole hypothesis, 152

Phthalocyanine
synthesis and photophysical properties of a new cationic water-soluble Zn phthalocyanine, 227
Picosecond time-resolved emission spectroscopy
temporally-separated ultrafast-emission dynamics of neutral and cationic molecules in guanine and its derivative aqueous solutions, 114
Polyethylene glycol
polymer bound pyrrole compounds, IX. Photophysical and singlet molecular oxygen photosensitizing properties of mesoporphyrin IX covalently bound to a low molecular weight polyethylene glycol, 53
Porphyrin
melanin–porphyrin interaction monitored by delayed luminescence and photoacoustics, 45
polymer bound pyrrole compounds, IX. Photophysical and singlet molecular oxygen photosensitizing properties of mesoporphyrin IX covalently bound to a low molecular weight polyethylene glycol, 53
photocleavage of plasmid DNA by the prophyrin *meso*-tetrakis[4-(carboxymethyleneoxy)phenyl]porphyrin, 128
Primary response
primary clinical response and long-term follow-up of solar keratoses treated with topically applied 5-aminolevulinic acid and irradiation by different wave bands of light, 145
Pro-oxidant
the carotenoids as anti-oxidants – a review, 189
Propylviologen sulfonate reduction
light induced redox reactions involving mammalian ferritin as photocatalyst, 83
Protochlorophyllide
room temperature fluorescence spectra of protochlorophyllide and chlorophyllide forms in etiolated bean leaves, 73
Protochlorophyllide reduction
protochlorphyllide reduction and greening in angiosperms: an evolutionary perspective, 201
Protonated cation
temporally-separated ultrafast-emission dynamics of neutral and cationic molecules in guanine and its derivative aqueous solutions, 114
Protoporphyrin IX
a hydroxypyridinone (CP94) enhances protoporphyrin IX formation in 5-aminolaevulinic acid treated cells, 136
Psoralen heteroanalogs
analysis of the mutations induced in the *E. coli lac Z* gene by a psoralen analog, 36
PUVA
different DNA repair time courses in human lymphoid cells after UVA, UVA_1, UVB and PUVA in vitro, 103

*rad*14
enzymatic recognition and biological effects of photodynamic damage induced in DNA by 1,6-dioxapyrene plus UVA, 60
Radicals
the carotenoids as anti-oxidants – a review, 189
Rat
effect of continuous and multiple doses of 5-aminolevulinic acid on protoporphyrin IX concentrations in the rat uterus, 122

Saccharomyces cerevisiae
enzymatic recognition and biological effects of photodynamic damage induced in DNA by 1,6-dioxapyrene plus UVA, 60
Salmonids
effect of UV-B radiation on goblet cells in the skin of different fish species, 222
SDS-PAGE with fluorescence detection
selective photoaffinity labelling of one mitochondrial protein in living cells of *Saccharomyces cerevisiae* with the fluorescent probe APMC. Identification of the target protein as subunit I of cytochrome c oxidase, 90
Single stand breaks
photocleavage of plasmid DNA by the prophyrin *meso*-tetrakis[4-(carboxymethyleneoxy)phenyl]porphyrin, 128
Singlet molecular oxygen
polymer bound pyrrole compounds, IX. Photophysical and singlet molecular oxygen photosensitizing properties of mesoporphyrin IX covalently bound to a low molecular weight polyethylene glycol, 53
Singlet oxygen
photocleavage of plasmid DNA by the prophyrin *meso*-tetrakis[4-(carboxymethyleneoxy)phenyl]porphyrin, 128
the carotenoids as anti-oxidants – a review, 189
Skin
effect of UV-B radiation on goblet cells in the skin of different fish species, 222
Skin cancer
UV induced erythema evaluated 24 h post-exposure by skin reflectance and laser Doppler flowmetry is identical in healthy persons and patients with cutaneous malignant melanoma and basal cell cancer, 30
Skin reflectance
UV induced erythema evaluated 24 h post-exposure by skin reflectance and laser Doppler flowmetry is identical in healthy persons and patients with cutaneous malignant melanoma and basal cell cancer, 30
Solar UV monitoring
continuous solar UV monitoring in Germany, 181
Soret band
photocleavage of plasmid DNA by the prophyrin *meso*-tetrakis[4-(carboxymethyleneoxy)phenyl]porphyrin, 128
Stress conditions
the effect of the OmpT protease on excision repair in UV-irradiated *Escherichia coli*, 245
Superoxide-dismutase
the use of endogenous antioxidants to improve photoprotection, 1

Temoporfin
post-exposure processes in Temoporfin-photosensitized cells in vitro: reliance on energy metabolism, 173
Time course
different DNA repair time courses in human lymphoid cells after UVA, UVA_1, UVB and PUVA in vitro, 103
Transition dipole orientation in vivo
orientation of the phycomyces blue light receptor – testing the single dipole hypothesis, 152
Tumour cells
study of the photochemical and phototoxic properties of lonidamine [1-(2,4-dichlorobenzyl)-1H-indazol-3-carboxylic acid], 11

Ultraviolet
the use of endogenous antioxidants to improve photoprotection, 1
Ultraviolet radiation
study of the photochemical and phototoxic properties of lonidamine [1-(2,4-dichlorobenzyl)-1H-indazol-3-carboxylic acid], 11
UV
UV induced erythema evaluated 24 h post-exposure by skin reflectance and laser Doppler flowmetry is identical in healthy persons and patients with cutaneous malignant melanoma and basal cell cancer, 30

UVA
different DNA repair time courses in human lymphoid cells after UVA, UVA_1, UVB and PUVA in vitro, 103
UVB
different DNA repair time courses in human lymphoid cells after UVA, UVA_1, UVB and PUVA in vitro, 103
UV-B radiation
effect of UV-B radiation on goblet cells in the skin of different fish species, 222
UV damage
aqueous humour and crystalline lens changes associated with ultraviolet radiation or mechanical damage to corneal epithelium in freshwater rainbow trout eyes, 165
UV irradiation
the effect of the OmpT protease on excision repair in UV-irradiated *Escherichia coli*, 245
UV monitoring
continuous solar UV monitoring in Germany, 181

Xanthophylls
the carotenoids as anti-oxidants – a review, 189

Yeast cells
selective photoaffinity labelling of one mitochondrial protein in living cells of *Saccharomyces cerevisiae* with the fluorescent probe APMC. Identification of the target protein as subunit I of cytochrome c oxidase, 90

Zinc
synthesis and photophysical properties of a new cationic water-soluble Zn phthalocyanine, 227
